Five questions before you buy another software.

Does it connect?

Is it our size?

Does it meet our rules?

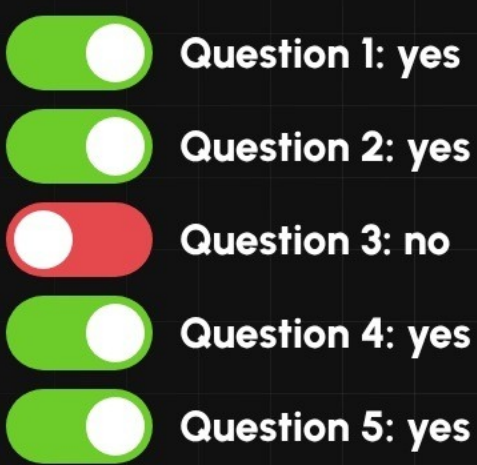

What makes it unique?

TURN2Digital

Ask before you sign

1. What does it do that nobody else does?
2. Can it connect without custom code?
3. Does it meet your industry's rules?
4. Is it sized for a company like yours?
5. Does it make the rest of your stack better?

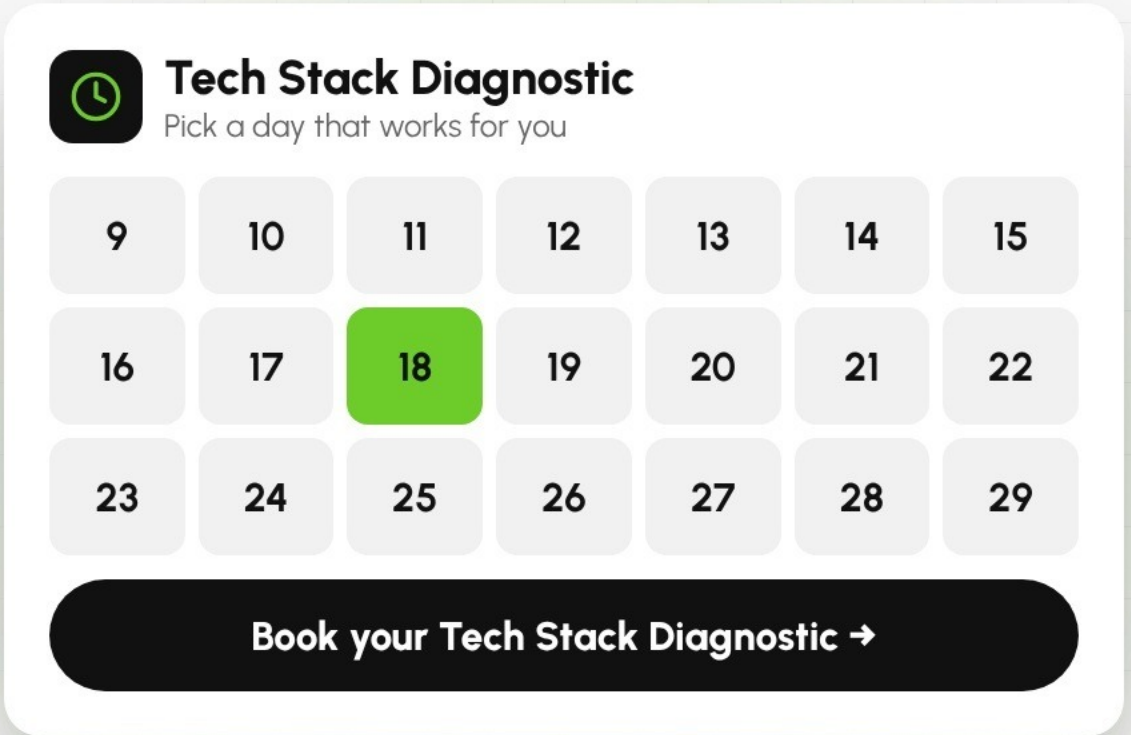

If one answer is no, it doesn't go in.

⊗ Not in your stack
